

Preceptorship OT Programme

You will take part in our well-established Preceptorship Programme, specifically designed to support newly qualified or transitioning Occupational Therapists as they move into professional practice. This structured period of development offers regular supervision, personalised mentorship, and ongoing guidance from experienced clinicians.

What we offer:

- A structured **Preceptorship Programme** tailored to newly qualified OTs
- A protected caseload to ensure safe, manageable learning
- **2 dedicated study days per month** for CPD and reflection
- Regular 1:1 supervision and mentoring from experienced OTs
- A welcoming, supportive, and values-driven team environment
- Opportunities to learn within multidisciplinary settings and contribute to service development

This is an excellent opportunity to develop and advance to a NRS2, once you have completed the Preceptorship Year and all progression criteria has been met.
